## WiMAX BreezeMAX Si

### Unit Setup

1. Open your WiMAX package and make sure you have the following items before proceeding:
  - a) BreezeMAX Si unit
  - b) AC Power adapter
  - c) Power cord
  - d) Ethernet cable
2. Next, setup your unit as follows:
  - a) Plug one end of power cord to adapter
  - b) Plug second end of power cord into wall power socket
  - c) Plug adapter cord into BreezeMAX unit
  - d) Insert one end of ethernet cable into BreezeMAX unit
  - e) Insert second end of ethernet cable into your PC or laptop ethernet port
3. Now you are ready to power-on your unit:
  - a) Power-on BreezeMAX unit as well as your PC or laptop if you have not already done so
  - b) Wait a few minutes while the BreezeMAX unit is initializing.
  - c) Initialization is complete once the 'Status' LED on the BreezeMAX unit displays a solid green light.
  - d) Check the 'Signal' LEDs as well which will give you a good indication of the signal strength your unit is receiving. The more green LEDs the better the performance.
4. Final step is to setup your PC or laptop to use BreezeMAX unit for wireless broadband:
  - a) Setup PPPoE\* on your PC or laptop
  - b) Enter in your Samoa.WS acct details
  - c) Click on connect and away you go!!!

**\*\*Please contact our helpdesk team if you have difficulty setting up your WiMAX unit\*\***

### \*PPPoE Setup
